

# Tectonic Plates

## Across

3. What is the fluid like layer under the Lithosphere?

5. Which of Earth's layers is first?

10. Which way do Transform Boundaries move?

12. What is a break in a body of rock, along which one block slides relative to another?

13. What is the Earth's outermost layer?

14. Which type of Crust is thicker and less dense?

15. What profession formed the Theory of Tectonic Plates?

16. Which type of Crust is thinner and more dense?

## Down

1. What are Tectonic Plates that move horizontally but do not collide?

2. What are Tectonic Plates that move towards each other?

4. What are the beginning of rock layers due to stress?

6. What are Tectonic Plates that move away from each other?

7. What is the second layer of the Earth before the Crust?

8. What do the Crust and part of the Mantle create?

9. What layer is before the Mantle?

11. What are Tectonic Plates made up of?
