

# The Cell Organelles

## Across

- 2.** Receives, packages, and sends proteins throughout the cell
- 10.** Controls all of the cells activity
- 11.** Gives structure to support the plant cell
- 12.** A maze of passage ways; carries ribosomes

## Down

- 1.** Little factories that produce protein
- 3.** Controls what can enter or leave the cell
- 4.** Captures the suns energy and is used to make sugar
- 5.** Converts energy in food to usable cell energy

- 6.** Breaks down large food molecules, recycles them, and removes the waste
- 7.** Are tiny structures that carry out specific functions within the cell
- 8.** Stores extra water, food, and waste
- 9.** Region between the cell membrane and the nucleus
