# The Digestive System

## Across

5. A muscular bag secretes gastric juice and mixes food around

8. The last section of the large intestine

9. Produce saliva to aid swallowing and lubricate the mouth

10. Produces some of the enzymes which are important for digestion

## Down

1. Digested food is absorbed here into the bloodstream

2. A long and narrow muscular tube that relaxes and contracts, moving swallowed food into the stomach

3. Undigested food goes here. Water and mineral salts from undigested food are absorbed

4. Bile is stored here until it is needed

6. Produces some of the enzymes which are important for digestion

7. Produces bile. Also removes toxins from your blood
