

The Hydrologic Cycle

Across

- 4. the water on or surrounding the surface of the globe including the water of the oceans and the water in the atmosphere
- 5. water that flows over the ground surface rather than soaking into the ground
- 7. water that fills the cracks and spaces in underground soil and rock layers
- 8. any form of water that falls from the clouds and reaches earth's surface
- 9. water in gas form
- 10. the solid portion of the earth, also called the geosphere

- 11. completely absorbed into the earth, also called infiltration

Down

- 1. the cycling of water through the hydrosphere
- 2. the process of water turning from gas to liquid
- 3. the regions of the surface of the earth occupied by living organisms
- 6. the process of water turning from liquid to gas
