

The Nervous System

Across

9. Neurons send what kind of signals?
10. How many parts does the nervous system have?

Down

1. What is your brain made of?
2. How fast can the nervous system send signals?
3. How many neurons does the human brain have?

4. How do the signals travel?
5. At any given time, what percentage of brain cells are active?
6. How many neurons does the human spinal cord have?
7. How do neurons communicate with other cells?
8. The main organ in the Nervous system
