# The Nervous System

1. Can only be either a muscle or a gland
  2. The role of the effector is to carry out the...
  3. Insulates the axon of the neurone
  4. Transmits impulses from the CNS to the effector
  5. Transmits impulses from the receptor to the CNS
  6. Pass the impulse from the sensory neurones to the motor neurones
  7. An action that does NOT involve conscious thought
  8. The gap between two neurones
  9. What is detected by a sense organ
  10. Eye, nose, skin, mouth, ear are all examples of...
- A. SENSE ORGANS
  - B. SYNAPSE
  - C. EFFECTOR
  - D. MYELIN SHEATH
  - E. REFLEX ACTION
  - F. RELAY NEURONE
  - G. SENSORY NEURONE
  - H. STIMULUS
  - I. RESPONSE
  - J. MOTOR NEURONE
