

The Solar System

Across

1. when an object in space gets between the sun and another object
 3. the spinning of a planet, moon or star on its axis
 4. the sun, planets, and their moons
 6. when the moon passes between the earth's shadow

7. movement of one object around another
 10. a shape like a circle that is stretched out in opposite directions
 11. a pattern of stars in the night sky
 12. a rocky object that orbits the sun

Down

2. when the moon passes between the sun and the earth
 5. a frozen object that orbits the sun
 8. the path an object follows around another planet
 9. a very large, round object that moves around a star
