

The Universe

Across

- 2. This method uses wavelengths.
- 4. Can produce its own light.
- 7. This theory started the universe.
- 8. These go through nuclear fusion.

- 9. Realistic background interference found in real telescope data.
- 10. An unknown force of energy.
- 12. Evidence of the big bang.

Down

- 1. This method looks for the dimming of a star.

- 3. This determines if the planet has water.
- 5. This law states that galaxies are retreating away from us.
- 6. A small movement of a star when a planet orbits it.
- 11. A group of star, dust, and gases.
