

# Theorist Graphic

**Across**

- 5. This theorist's theory, states that development is influenced by five environmental systems. Five systems are: Microsystem, Mesosystem, Exosystem, Macrosystem, and Chronosystem.
- 6. Created the Theory of Psychosexual development, made up of these five stages: Oral, Anal, Phallic, Latency, and Genital.
- 8. Discovered classical conditioning, by observing dogs natural reaction to their food, then added the sound of a bell.
- 11. Created the Psychosocial Theory that has eight stages of development; in each stage the individual has a crisis that they must resolve, in order to move on to the next stage.

- 12. This theorist believed that children need freedom to choose their own activities, while the teacher is there as a facilitator.
- 13. This theorist believed that the ethological theory is very important for development, and he also argued that the relationship between a child and caregiver, will affect the child later in life.

**Down**

- 1. This theorist proposed the "Over Lapping Wave" model for cognitive development.
- 2. Created operant conditioning, which is half rewarding good behavior and half punishing bad.
- 3. This theorist believed that there are four stages of cognitive development, which are centered around the skills of organization and adaptation.

- 4. Created the social cognitive theory and believes that cognition, environment, and behavior all play a big part in a child's development.
- 7. Created the Sociocultural Cognitive Theory, and the ZPD (Zone of Proximal Development).
- 9. Developed the term of imprinting, by observing the greylag geese, ability to follow their mother right after they hatch.
- 10. This theorist believed that moral education wasn't a part of the programs, because it is present in their moral atmosphere or "hidden curriculum" .
