

Thermochemistry Vocabulary

Across

- 1. temperature when molecules stop moving completely
- 6. phase/state that has no definite shape or volume
- 7. phase change when a gas turns directly in to a solid
- 8. phase change when liquid turns to gas slowly
- 9. phase change from a liquid to a solid

- 11. phase/state with a definite shape and definite volume
- 12. phase/state that has definite volume and indefinite shape
- 13. phase change from a gas in to a liquid
- 14. when there is a major increase or decrease in energy of a substance
- 15. average amount of energy within a system

Down

- 2. phase change when a solid or liquid turns in to a gas
- 3. temperature when a substance will turn into a gas, quickly
- 4. when water molecules are in a gaseous state
- 5. phase change when solid turns directly in to a gas
- 10. phase change when when a solid becomes a liquid
