

This is Boring

Across

- 3. The distance from the center of the circle to its outer rim.
- 4. A chord that passes through the center of the circle. The length of a diameter is two times the length of a radius.
- 6. A line that intersects a circle in exactly one point.
- 9. Two or more circles that intersect at one point.
- 10. A line segment whose endpoints are on a circle.

- 11. Two or more circles with the same radius, but different centers.
- 13. A line that intersects a circle in exactly one point.
- 14. A line segment whose endpoints are on a circle.
- 15. The point where a tangent line touches the circle.

- 5. Two or more circles that have the same center, but different radii.
- 7. The distance from the center of the circle to its outer rim
- 8. Two or more circles with the same radius, but different centers.
- 12. A line segment whose endpoints are on a circle.

Down

- 1. The point where a tangent line touches the circle.
- 2. A line that intersects a circle in two points.
