

Tissues

Across

2. extensions form nerve cell body that convey signals to cell body

6. extensions that convey signals to another neuron or muscle cell

7. skin, nails, hair

8. involuntary movement, striated w/ intercalating junctions

9. supporting cells that insulate axons & nourish neurons

Word Bank

dendrites

axons

cardiac muscle

smooth muscle

skeletal muscle

epidermis

neurological cells

neurons

dermis

integumentary system

10. outer layer of skin, surface of tightly packed dead cells

Down

1. carry signals by conducting electrical impulses

3. beneath epidermis, dense connective tissue

4. causes voluntary movement, striated

5. involuntary movement of internal organs, no striations
