

# Tooth Development

## Across

3. Future cementum, alveolar bone and PDL

8. Future enamel

11. Enamel pearls form during which stage of tooth development?

12. Change in identical embryonic cells to become distinct structurally and functionally

13. Another name for tooth development

14. During which stage of tooth development does microdontia occur?

15. Future dentin and pulp

16. Controlled cellular growth and accumulation of byproducts

## Down

1. There are how many stages in tooth development?

2. Attainment of adult function

4. Development of specific tissue structure or differing form due to embryonic cell migration

5. Action of one group of cells on another

6. A union of two or more teeth through cementum

7. During which stage of tooth development does anodontia occur?

9. During which stage of tooth development does germination occur?

10. A distortion of Hertwigs root sheath can result in a bent root known as?
