

Name: _____ Date: _____

Triangles/Lines/Angles

1. a triangle that has one obtuse angle
 2. a triangle that has all three sides the same length
 3. a triangle that has at least two sides the same length
 4. a triangle that has no sides the same length
 5. a triangle that has three acute angles
 6. a triangle that has one right angle
 7. two rays connected at a common endpoint
 8. an angle that measures 135 degrees would be this type of angle
 9. part of a line with one end point
 10. angle that measures exactly 90 degrees
 11. lines that intersect and create 4 right angles
 12. lines that never intersect
- A. ray
 - B. right angle
 - C. parallel lines
 - D. equilateral triangle
 - E. angle
 - F. obtuse triangle
 - G. right triangle
 - H. scalene
 - I. isosceles triangle
 - J. perpendicular lines
 - K. acute triangle
 - L. obtuse angle
