

# Trigonometry

## Across

4. Looking down at something gives an angle of \_\_\_\_\_

7. The name given to the side of a triangle that is across from the angle

8. The name of the symbol used to indicate an angle. Starts with T

11. The top most direction on a compass

12. The name given to the side of a triangle that is next to the angle

## Down

1. The study of triangles and ratios

2. The name given to the longest side of a triangle

3. The trigonometric ratio that uses the Adjacent and Hypotenuse

5. Looking up to something gives an angle of \_\_\_\_\_

6. The trigonometric ratio that uses the Opposite and Hypotenuse

9. The trigonometric ratio that uses the Opposite and Adjacent

10. A true bearing has how many digits
