

# Types Of Angles (Clemons)

## Across

3. Wide angles.  
 7.  $\angle ZKY$  is measured at 56.  $\angle PKX$  is a vertical angle to  $\angle ZKY$ . What is the value of  $\angle PKX$  in half?  
 13. The pairs of angles on opposite sides of the transversal, but inside the two lines.  
 14. Relationship between a star's distance and its \_\_\_\_\_ angle.  
 15. Two angles with the same measure.

16. The bottom angles of a triangle. (Line)  
 17. 90 degree sum of two angles.  
 19. A line that passes through two lines in the same plane at two points.  
 20. Astrologers tool.  
**Down**  
 1. Having corners.  
 2. Small angles.  
 4. Line in two  
 5. Two supplementary angles.  
 6. Angles with a sum of 180.

8.  $\angle A$  is measured at 36,  $\angle B$  is an adjacent angle to A. What is the value B?  
 9. Where two straight lines cross each other. (Point)  
 10. Four 90 degrees.  
 11. Tool based on the Sun's angle.  
 12. Angles unit.  
 18. Another name for an angle.
