

Types of Energies

Across

- 2. What kind of energy powers a heater
- 4. Energy stored in the bonds of atoms
- 7. You can feel this energy without touching it?
- 10. Energy stored in atoms
- 11. There is infinite energy in the universe: T or F
- 15. Energy that is stored
- 17. If a roller coaster is at the lowest point, does it have more or less kinetic energy

- 18. Energy in motion that does work
- 19. The only form of energy we can see directly
- 20. The flow of electric charge

Down

- 1. Energy in motion
- 3. Energy stored in a rubber band
- 5. Objects that posses energy based on their position in a gravitational field
- 6. What makes a windmill move

- 8. Energy can only be transformed: T or F
- 9. What powers solar panels?
- 12. Atoms vibrating together to create heat
- 13. If you were to eat, What type of energy would you have
- 14. Does the highest point on a mountain have more or less potential energy?
- 16. When waves travel through the air
