

UNIT 5

Across

2. gives information about the blood flow through the arteries
 7. malformations of heart structure existing at birth
 10. blood pressure
 12. vessel
 13. coronary artery disease
 14. records the electrical activity of the heart
 18. artery
 19. heart
 21. records heart beats over 24-48 hours during normal activities

22. damage to the heart muscle and heart valves
 23. monitors heart while you walk or bike
 24. disease of the blood vessels supplying the heart muscle
 25. pumps blood through system

Down

1. collects blood from the capillaries
 3. vessels that deliver blood to tissues
 4. chronic heart disease
 5. disease of blood vessels supplying arms and legs
 6. disease of the blood vessels supplying the brain

8. uses sound waves to evaluate heart chambers and valves
 9. networks of small vessels that perform tissues
 11. vein
 15. chest x-ray
 16. oxygen
 17. vessels that return blood to the heart
 20. computed tomography
