

Name: _____ Date: _____

Unit 3 Proteins & Amino Acids

1. essential organic constituent of living organism
 2. Any group of conjugated proteins with at least one lipid component
 3. Toxin produced by peanuts produced by a fungus
 4. A member of the cabbage family
 5. Form of NPN that has a slower breakdown rate and can be safely fed to ruminants
 6. Bovine spongiform encephalopathy
 7. BSE when present in humans
 8. Proteins that can be converted to gelatin
 9. Like proteins found in ligaments and artery walls
 10. Proteins containing carbohydrates
 11. #1 potential problem for feeding poultry waste
 12. high in oil
 13. oil used for horses and show cattle for hair bloom
 14. made from linseed; highest amount of Omega 3 fatty acid of any oil seed
 15. high palatability
 16. not palatable
- A. Glycoprotein
 - B. Protein
 - C. Linseed meal
 - D. Elstins
 - E. Feathermeal
 - F. Soybean meal
 - G. Collagens
 - H. Creutzfeldt-Jakob Disease
 - I. Aflatoxin
 - J. Full-fat soybeans
 - K. Salmonella
 - L. Rapeseed
 - M. Flaxseed
 - N. Biuret
 - O. Mad-Cow Disease
 - P. Lipoprotein
