

Unit 7-Nerve Tissue

Across

6. Staining method that uses a mordanted hematoxylin
 10. Method for staining Astrocytes with gold sublimate
 11. Where is Nissl Substance found
 14. The metal molecule in the Luxol Fast Blue method
 15. A main component of myelin sheath
 16. What type of stain is Cresyl Echt Violet

17. A fixative good for preserving neuroglia

Down

1. The excess mordant differentiator used in Weil's
 2. A method for demonstrating myelin that is similar to the Alcian Blue technique
 3. A stain for Nissl Substance
 4. Ammoniacal silver method for neurofibers

5. A reagent that removes unreacted silver
 7. A good control for Nissl Substance
 8. Ammoniacal silver method for neurofibers that is untuned
 9. The main reducing agent for silver stains
 12. A Luxol Fast Blue combination method
 13. Acronym for IHC to demonstrate neuroglia
