

Name: _____

Date: _____

Upper limb and trunk

Across

- 1. elongated threads found in striated muscle cells
- 3. fingers
- 7. a bone in the wrist
- 9. a unit of myofibril in a striated muscle
- 12. a bony process on the scapula
- 13. a flexible cord of strong, fibrous collagen tissue attaching muscle to bone
- 15. the opening into the vertebral canal in the sacrum
- 16. constriction below the tubercles
- 17. a shallow depression on a bone into which another bone fits
- 21. lateral curvature of the spine
- 23. the second vertebra
- 27. the topmost vertebra
- 28. the distal superior boarder of the pelvic girdle
- 32. bones of the wrist
- 35. carpal bone articulating with the radius
- 36. a fluid filled sac
- 37. the thinner bone in the forearm

Down

- 2. where the spinal cord passes through
- 4. an immovable articulation
- 5. the process of breathing
- 6. inward curvature of spine; arched
- 8. large muscles in upper arm
- 10. smaller bone of the lower leg
- 11. a protein involved in muscle contraction
- 14. the synapse between a motor neuron and a skeletal muscle
- 18. conical movement extending from the joint
- 19. muscle attaching to the shoulder
- 20. finger tips
- 22. a compact head of a structure
- 24. the action of bending
- 25. the muscular partition separating the thorax from the abdomen
- 26. skeletal framework attaching the upper limbs, clavicles and scapulas
- 29. the groove at the lower end of the humerus
- 30. cartilage containing fibrous bundles of collagen
- 31. shoulder blade
- 33. movement towards the midline
- 34. the distal branches of a neuron axon
- 38. the dip between the neck and collarbone
- 42. movement away from the midline
- 44. collarbone
