

# Using Math to Find Your Way

## Across

3. a shape that has four right angles  
 5. the x-coordinate of a point where a graph intersects the x-axis  
 8. A polynomial with two terms  
 9. the vertical distance between two points  
 11. a mathematical statement that two expressions are equal

14. a mathematical process such as addition, subtraction, multiplication or division

15. a fixed reference line for the measurement of coordinates

16. a quadrilateral with opposite sides parallel

## Down

1. the y-coordinate of a point where a graph intersects the y-axis  
 2. lines that intersect at right angles

4. lines that have the same slope

6. having the same value

7. the numbers in an ordered pair that locate a point on a grid

10. can be determined by calculating rise/run

12. a polynomial with 3 terms

13. the horizontal distance between two points
