# Veterans and PTSD

## Across

- 2. The process of reintroducing a person (Junger uses the example of veterans) to society
- 4. A person must serve to be considered a veteran
- 5. The most widely recognized outward symptom of the answer to number one
- 8. strong emotional bonds within the company or the platoon
- 10. Junger says that veterans should not be considered this because it makes re-joining society more difficult for them

## Down

- 1. a mental health condition commonly associated with veterans
- 3. mutual trust and friendship among people who spend a lot of time together that Junger speaks about and how soldiers value this greatly
- 6. The outward symptoms of number one that many veterans show
- 7. Junger defines this as a close-knit community in which people act for the common good
- 9. A distressing experience that Junger frequently mentions in connection to war
