

Vital signs and measurements

Across

2. ventilation rate is greater than metabolic rate
 3. lowest amount of pressure exerted during cardiac cycle
 7. device for measuring liquid or gaseous pressure
 11. increased respiratory rate and depth
 14. fold of mucous membrane
 15. pertaining to apex of heart
 16. without fever
 17. known initial measurement/future measurements compared

18. cessation or absence of normal spontaneous breathing

20. fever
 21. abnormally slow respiratory rate
 22. abnormally low blood pressure
 23. a form of arteriosclerosis marked by calcium deposits in the arterial linings

Down

1. slow; regular heartbeat
 4. increase in size, number, or extent

5. decrease in respiratory rate with shallow depth of respiration

6. blood pressure consistently greater than 140/90mm HG

8. normal breathing

9. labored breathing

10. regular pattern of irregular breathing rate

12. curvature appearing in liquid upper surface

13. space within an artery

19. deviation from the normal pattern or rhythm of heartbeat
