

Vocab Cross word

Across

4. macromolecule that forms when long chains of molecules called nucleotides join together
 9. A living thing made up of two or more cells
 10. macromolecule made up of one or more sugar molecules
 11. organism's ability to maintain steady internal conditions when outside conditions change
 12. long chain of amino acid molecules

13. reaction that eukaryotic and prokaryotic cells can use to obtain energy from food when oxygen levels are low

14. series of chemical reactions that convert light energy, water, and carbon dioxide into the food energy molecule glucose and give off oxygen

Down

1. movement of substances through a cell membrane without using the cell's energy

2. the movement of substances through a cell membrane using the cell's energy

3. A living thing made up of only one cell

5. all living things are made of cells, cells are the smallest units of life, and all new cells come from existing cells

6. The smallest unit of life

7. Something that has all the characteristics of life

8. large macromolecule that does not dissolve in water
