

Vocabulary Project

Across

- 3.** waves of energy that travel through the Earth's layers
7. fine-grained volcanic rock
8. region of the earth between the crust and the core
12. movement caused within a fluid
14. heat is directly transmitted through a substance
16. hard outer layer of the earth
17. matter that make up the earth and its atmosphere

19. all the waters on the earth's surface

- 20.** force on or against an object
21. rigid outer part of the earth
23. current in a fluid that results from convection.

Down

- 1.** parts forming a complex whole
2. break down
4. a very hard, igneous rock
5. build up
6. emission of energy as electromagnetic waves

9. innermost part

- 10.** upper layer of the earth's
11. envelope of gases surrounding the earth
13. the regions of the surface
15. degree of compactness of a substance
18. fluid layer about 2,300 km thick
22. property of matter and radiation
