

Vocabulary Project #3

Across

4. Having two different alleles for a trait.

6. An allele that is hidden when a different allele is present.

9. An organism's genetic makeup.

10. An allele whose trait always shows up in the organism when the allele is present.

Down

1. Having two of the same alleles for a trait.

2. The different forms of a gene.

3. A condition in which neither of two alleles of a gene is dominant or recessive.

5. An organism's physical appearance.

7. Structure within the nucleus containing the genetic information.

8. Part of the DNA that controls a trait.
