

Vocabulary

Across

- 3. identifies outliers & raw data
- 4. above average values accompany above average values
- 7. measures an outcome of a study
- 9. measures direction & strength of linear relationship

- 10. standard deviation of data
- 11. bell shaped, density curves, symmetric
- 12. negative values accompany below average values
- 13. standard normal dist.
- 14. overall pattern in the actual data

Down

- 1. 3 standard deviations of mean
- 2. explains changes in a response variable
- 5. M
- 6. relationship between 2 variables on the same individuals
- 8. symmetric density curve
