

Wall Angles and Hold Types

Across

- 2. A wall angle that has three different wall angles coming together! Hint: what does Santa come down?
- 4. A wall angle that hangs over your head and requires you to lean really far back!
- 6. a rounded (sloping) hold that requires climber to use friction and body positioning to stay on the wall --grip using your mitten hands
- 8. a hold you can pinch! Utilize your fingers and thumbs to grab the hold.

10. A very small hold to place your foot!

12. an in-cut hold able to be used like a handle- the thank goodness hold! Very easy to grab!

13. A wall angle that goes directly up and down - 90 degrees!

Down

1. A wall angle that has two walls coming together to make a crease - kind of like the inside of a book!

3. A hold that you have lean all the way back to grab - you grab it from below!

5. A wall that slants away from you! Think about running up a hill!

7. A very very thin hold that can only be held onto by your finger tips

9. a round hold into which only one, two, or three fingers fit, resembles a donut!

11. A wall angle that has two walls coming together that sticks outward - kind of like the spin of a book!
