

Name: _____

Date: _____

Water Water Everywhere

Across

- 3. particles carried by rivers or other bodies of water
- 5. a period or season of heavy rainfall in a location's yearly weather cycle; in contrast to a 'dry season' which has less or no rainfall
- 7. insufficient supply or shortage
- 8. the process where water changes from a gaseous state to a liquid state
- 10. water stored under the ground

11. the artificial application of water to land to assist in the production of crops

12. a manufactured device to tap water from an artesian basin or aquifer

13. an area characterised by sloping topography (landscape) that drains surface water into rivers, streams, lakes or oceans

Down

1. the wearing away of the land and rock by wind, water or ice

2. the intensification or spread of arid conditions which can occur in already arid or desert areas where average rainfall has declined over time

4. the process where water soaks into the soil and underlying rock layers

6. something produced or left over in the process of making something

9. an interconnected system existing in a particular region, where animals and plants exist in communities and interact with the environment around them
