# Water in Our World Vocabulary

- |  |                     |
|--|---------------------|
| 1. ___ the force that holds a liquids outer surface together   | A. Turbine          |
| 2. ___ the ability of a liquid through adhesion to move upward through a small space despite gravity           | B. Surface Tension  |
| 3. ___ water in the form of a gas  | C. Salinity         |
| 4. ___ how closely the molecules compact in a given substance  | D. Density          |
| 5. ___ a body of water containing a low amount of salt   | E. Conserve         |
| 6. ___ a body of water containing a high level of salt   | F. Groundwater      |
| 7. ___ the measurement of salt content in a given body of water  | G. Fresh Water      |
| 8. ___ the cycle of the rising and lowering of the ocean water level in a specific area                        | H. Iceberg          |
| 9. ___ a smaller body of water flowing in one direction through a larger body of water                         | I. Erosion          |
| 10. ___ a very large piece of ice floating in the ocean or sea   | J. Tide             |
| 11. ___ a large mass of ice that covers an area of land and moves very slowly downhill                         | K. Sediment         |
| 12. ___ broken down bits of rock, sand, and soil that are moved by water, ice, or wind and deposited elsewhere | L. Deposition       |
| 13. ___ when rocks, soil, and sediments are deposited in a new location  | M. Hydropower       |
| 14. ___ the carrying away of rocks and soil by wind, water or ice  | N. Capillary Action |
| 15. ___ the breaking down of rocks by the water or wind  | O. Water Vapor      |
| 16. ___ water found beneath the surface of the earth   | P. Glacier          |
| 17. ___ a landform created when the end of a river meets a lake or sea and deposits a lot of sediment          | Q. Current          |
| 18. ___ to protect something from ham, contamination or unnecessary waste                                      | R. Weathering       |
| 19. ___ a wheel turned by flowing water, often used to provide power for machinery                             | S. Delta            |
| 20. ___ power that comes from moving water   | T. Waterwheel       |

21. \_\_\_ a machine with blades that rotate from the flow of water or steam,  
similar to a waterwheel

U. Salt Water
