# Waves

## Across

- 5. A light is bent
- 6. The area in a compressional wave where the particles are farthest apart
- 7. The wave with the highest frequency
- 9. Light we can see
- 10. A wave bounces off an object
- 11. Solid, liquid, and gas

## Down

- 1. The length from crest to crest or compression to compression
- 2. The point in a longitudinal wave where the particles are closest together
- 3. A wave bends around an object it can't pass through
- 4. Waves with up and down motion
- 8. The distance from the rest position
