

Name: _____

Date: _____

Weather

Across

- 2. A visible collection of tiny water droplets or, at colder temperatures, ice crystals floating in the air above the surface. They come at different sizes and shapes.
- 7. is a change from the liquid to the gaseous state
- 9. Is the state of the atmosphere at a certain place and time
- 10. The change of water vapor to liquid water, as when fog or dew forms

Down

- 1. Is the pattern of weather over a long period of time
- 3. A boundary between two air masses, one cold and the other warm, moving so that the colder air replaces the warmer air
- 4. is the boundary where two different air masses meet
- 5. the constant movement of Earth's water from the surface to the atmosphere and back again
- 6. A cloud on the ground that reduces visibility
- 8. is the amount of water vapor in the air
