

Weather, Climate, & the Water Cycle

Across

1. The set of weather conditions that prevail in a region year after year
4. Water found in rivers, lakes, glaciers, ice sheets, and underground that contains low concentrations of salt
5. The movement of water on a surface to areas of lower elevation
8. Describes the condition of the air outdoors, such as wind speed, temperature, cloud cover, and rainfall

11. How hot or cold something is
12. A buildup or gathering of something that occurs over time
13. Physical change in matter from a gas to a liquid
15. The amount of water vapor in the air
16. Rain, sleet, snow, or hail that falls from clouds in the sky

Down

2. Water found in oceans and lakes that contains 3-4% salt

3. The passage of water vapor from a plant to the atmosphere
6. Physical change in matter from a liquid to a gas
7. The constant movement of water through the land, air, oceans, and living things
9. The entire body of saltwater that covers about 71% of Earth
10. Pieces of information
14. Common
