

Weather Puzzle

Across

- 3. energy moving through solids
- 8. incoming solar radiation
- 9. condition of atmosphere over many years
- 11. the point when air can't hold water
- 12. measures air pressure

- 13. how much energy something has
- 14. energy moving through fluids
- 15. energy involved with phase changes

Down

- 1. how much open space between particles
- 2. how much water is in the air

- 4. instrument that measures dew point and relative humidity
- 5. horizontal movement of the air
- 6. instrument that measures wind
- 7. how much energy something takes to heat up
- 10. how full of water the air is
