

Weather

Across

2. water's ability to pass through

5. how full of water the air is

9. how much energy something has

11. how much open space between particles

12. how much water is in the air

14. instrument that measures dew point and relative humidity

15. water's ability to creep upwards

Down

1. condition of atmosphere over many years

3. energy transfer through fluids

4. energy moving through solids

6. instrument that measures wind

7. temperature change with altitude change

8. horizontal movement of air

10. measures air pressure

13. Condition of atmosphere over a short time
