

Weather

Across

- 2. Invention that measures air pressure
- 6. Tropical storm with inward spiraling winds
- 7. Cloud that is feather-like and wispy
- 10. A Force that tries to push winds to shift to the right or left
- 12. Precipitation when you need an umbrella.

- 13. Quick rotating column of air
- 14. Cloud that brings thunderstorms
- 15. A cycle of water when it starts at the bottom ends at the top.

Down

- 1. An imaginary line that marks places of equal atmospheric pressure
- 3. Fast flowing air currents

- 4. Energy formed by contact
- 5. The temperature when water starts to condense
- 8. An Invention that measures atmospheric humidity
- 9. A natural movement of air at any speed
- 11. The boundary between two different air masses
