

The Parts of the Cell

Across

- 2. Controls what comes in and out
- 3. Contain strong digestive enzymes that help break down food or unwanted parts like each white blood cells in tadpole tails
- 7. Protects and gives shapes in plant cells
- 8. Site of cellular respiration
- 9. General storage and maintenance

- 10. Site of protein synthesis

Down

- 1. Site of photosynthesis
- 4. Labels cells for where they are going
- 5. Watery gel that surrounds the cell contents
- 6. Contains DNA which proteins are made
