

# atomic structure

## Across

2. what element has 8 electrons in group 7
4. how many electrons are in the first shell
6. how many electrons does a group 7 have to get a full outer shell
8. What element has the letter Y
10. what is the charge of a neutron

## Down

1. what is the charge of a electron
3. what group 1 element has a electron number of 19
5. what is the charge of a proton
7. What is the maximum number of Electrons in each Shell
9. What element has the letters AU
