

# c2.2 bonding and carbon

## Across

- 4. A charged atom
- 7. when charged, non-metals are
- 8. The type of bonding between a positively and negatively charged ion
- 9. when charged, metals are
- 10. Ions are stable because they have full outer...

## Down

- 1. The type of bonding which involves a shared pair of electrons
- 2. This form of carbon can conduct electricity
- 3. The different forms of carbon
- 5. An atom that loses an electron will become...
- 6. How many electrons does flourine have in its outer shell?
