

Name: _____

cell

Across

5. what's that solution that fills cells?

7. what is it called when a high concentration moves to a low concentration area?

8. organisms with one cell??

9. what is it called when cell fluids get separated by a membrane?

10. what is it called when a membrane can differentiate molecules?

11. what's that layer surrounding some cells outside the cell membrane?

12. what's the membrane that protects organelles?

13. what are organelles that conduct photosynthesis?

Down

1. what's that membrane that provides extra barrier?

2. what's that organelle that is in plants, fungal, animals, and bacterial cells?

3. what's that membrane that generates chemical energy for the cell's biochemical reactions?

4. what is that membrane organelle that holds dna?

6. organisms with more than one cell??
