

# cell crossword BY:JORDYN HUNTER

## Across

**3.** consisting of RNA and associated proteins found in larger numbers in cytoplasm

**8.** the opposite of eukaryotes

**11.** a space or vesicle within the cytoplasm of the cell

**12.** a double membrane organelle found in most eukaryotic cells

**13.** the central known and most part of the object

## Word Bank

smooth endoplasmic reticulum

nucleolus

rough endoplasmic reticulum

golgi body

cells

**14.** the smallest unit of life in everyones body

**15.** a complex of vesicles and folded up membranes

## Down

**1.** the opposite of the rough endoplasmic reticulum

**2.** is a type of organelle in the cell pf eukaryotic organisms that from an interconnected network like tubes like structures

**4.** the opposite of prokaryotes

ribosomes

nucleus

cytoskeleton

cell wall

eukaryotes

**5.** is found in all eukaryotic cells like human, animal, fungal, and plant cells

**6.** is a membrane bound organelle in nearly all animal cells

**7.** is a biological membrane that separates the inter of all all cells from the outside environment

**9.** a cylinder like cellular organelle

**10.** a small dense spherical structure in the nucleus of the of the cell

centrioles

cell membrane

mitochondria

prokaryotes

lysosomes
