

# chemistry

## Across

**3.** the ability to bend and shape metal easily

**5.** amount of space an object uses

**9.** a change that isn't reversible

**10.** a type of hard material

**12.** not strong and fragile

**13.** how fast a liquid flows

**14.** a change that is reversible

## Down

**1.** group of metal that burns when in contact with oxygen

**2.** equal to the amount of protons

**4.** number on the periodic table

**6.** a chemical reaction

**7.** equal to the atomic mass

**8.** equal to the amount of electrons

**11.** everything is made up of this
