

chemistry

Across

3. atoms are different in a

4. strongest bond

8. two or more atoms joined make a

12. Color odor weight melting hardness softness etc are all

13. all are the same in an

14. hair is made up of protein called

15. Solid liquid and gas are all -----of matter

Down

1. backbone of all protein link with

2. chemical behavior depends on number of electrons in the

5. positive charged are

6. changes in characteristics without changing substance

7. anything that occupies space

9. chemistry that had carbon

10. negative charged are

11. equality broken bond
