

cranial nerves

Across

2. This nerve has auditory and vestibular branches
 7. Levels: IX to XII
 11. obstruction of blood supply in cerebrovascular system is always
 12. Regulates respiration, phonation, heartbeat, blood pressure
 15. This nerve communicates visual information to brain
 16. How many pair of coccygeal nerves are there
 17. Has 12 vertebrae

18. Regulates reflexes
 19. Superior-most structure of brainstem
 20. Divided into medulla, pons, and midbrain
- ## Down
1. sensory information enters the _____ root
 3. The nerve doesn't go through the thalamus
 4. Regulates body functions such as temperature, satiation, water balance, emotional behavior, sexual response

5. These nerves control and receive information from cranial nerves
 6. Information lifeline to and from periphery of the body
 8. Integrates sensorimotor functions and perception
 9. spinal cord is wrapped in _____ linings
 10. This nerve innervates muscles of mastication
 13. This nerve turns eyes down and in
 14. Spinal cord contains _____ pairs of spinal nerves
