

Name: _____

Date: _____

evolution

Across

3. change in a species over time
6. similarities between embryos as they grow & develop
7. Deoxyribonucleic acid
8. a physical or behavioral characteristic of an organism
12. an unborn/unattached offspring
13. amount of different types of genes in a population

15. what organisms do in order to survive in their habitats

16. ribonucleic acid
18. how populations change due to migration

Down

1. choosing a partner based on genetics or a specific trait
2. change in an organisms dna code
4. when a catastrophe changes a population

5. how organisms adapt and change to survive

9. species that have similar sturctures (bone, placement, function); homologous ____

10. group of reproductively unique organisms

11. studying DNA codes to see similarity between organisms

14. when organisms are separated due to geography

17. pieces of dna that code for a specific trait
