

film techniques

Across

1. the camera shoots from below
4. can be in the background, incidental or a specific sound track
10. the camera moves left or right
13. where the action takes place, the location of the scenes
14. An artificial way to create an image or illusion
15. taken at eye level
16. an object fills the fills the frame

17. the camera moves in and out of shot quite rapidly

18. the camera shoots from above

Down

2. can be part of the story or artificial sounds
3. looking into the distance, often with something in the foreground
5. Taken from immediately ahead
6. From the characters perspective.

7. strong clear light, this light can be daylight or artificial

8. An object fills the frame completely, it may extend beyond the frame

9. a sudden cut between shots

11. can be strong or pale or natural. The use of colour filters change the image

12. the film image is not sharp, often used to romantacise or hide something
