- |                        |                      |                      |                      |                     |
|------------------------|----------------------|----------------------|----------------------|---------------------|
| Perpendicular bisector | Equilateral triangle | Supplementary angles | complementary angles | Inductive reasoning |
| perpendicular lines    | center of rotation   | line of symmetry     | vertical angles      | segmentbisector     |
| Terminal point         | transformation       | angle bisector       | straight angle       | initial point       |
| obtuse angle           | Base angles          | transversal          | translation          | linear pair         |
| Linesegment            | Reflection           | Hypotenuse           | rightangle           | acuteangle          |
| anglesides             | Postulate            | Endpoints            | Converse             | Rotation            |
| symmetry               | midpoint             | colinear             | Parallel             | Coplanar            |
| vector                 | vertex               | angle                | plane                | point               |
| legs                   | line                 | ray                  |                      |                     |
