Across

5. what is the longest side of a right triangle?
8. what is the horizontal number line on a coordinate plane?
12. what is another number that when multiplied by itself twice is equal to the given number?
13. a number, a variable, or the product of a number and one or more variables is called?
14. what are the terms that have exactly the same variable factors?
15. the axes divide the plane into four sections called?
16. what are all rational and irrational numbers?

17. what is the number of the horizontal units a point is from the origin?

19. what is a decimal that ends?

20. what are numbers that cannot be written in the form a/b ?

Down

1. an equation that shows the relationship between the legs and the hypotenuse of a right triangle
2. what is a decimal that repeats the same digit or group of digits forever?
3. what is the vertical number line on a coordinate plane?
4. what is the number that is the square of a whole number?

6. what are numbers that can be written in the form a/b ?

7. what is a grid formed by the intersection of two number lines?

9. what is a number that is the cube of a whole number?

10. what is a number that when multiplied by itself is equal to the given number?

11. what are the two shortest sides of a right triangle?

18. what is the point where the axis intersect?
