

Name: _____

Date: _____

math vocabulary

Across

- 5. the distance around a circle
- 14. the multiplicative inverse of a number
- 16. a relationship between symbols and/or variables that is balanced and includes an equal sign
- 17. the bottom symbol or number of a fraction
- 19. 3. 14
- 20. a line segment whose endpoints lie on the center of the circle and the outside edge
- 22. an integer which can be divided by 2, with no remainder
- 24. a whole number that is positive or negative
- 25. an expression in algebra that consists of only one term

- 27. a geometric figure created by two rays and a common endpoint
 - 28. the middle item in an ordered group
 - 29. the horizontal axis
 - 30. two angles that add up to 90 degrees
- Down**
- 1. the number in front of the variable
 - 2. a number that can only be divided by itself and one
 - 3. two angles whose measure adds up to 180 degrees
 - 4. an expression in algebra that consists of 3 terms
 - 6. a number less than zero
 - 7. a number that expresses the power to which the quantity is to be raised, it is placed above and to the right of the number

- 8. the top symbol or number of a fraction
- 9. the vertical axis
- 10. 0, 1, 2, 3, 4, 5, etc.
- 11. written as two equal ratios, one fraction = another fraction
- 12. an expression in algebra that consists of two terms
- 13. (0,0) on a coordinate grid
- 15. to combine like terms into fewer terms
- 18. the result of dividing the sum of two or more quantities by the number of quantities
- 21. an angle which is less than 90 degree
- 23. the square root of a negative number
- 26. a symbol that stands for a number
